ArcTrade Inc.

Dear Hiring Committee,

I am writing to express my strong interest in the Software Development Engineer position at ArcTrade. With a solid background in data and software engineering, specialized expertise in distributed algorithms, and hands-on experience with machine learning, I am enthusiastic about the opportunity to contribute to ArcTrade's mission of transforming the energy sector through innovative digital solutions.

ArcTrade's comprehensive energy technology platform, which integrates complex operations such as energy trading, risk management, load forecasting, and carbon-free energy tracking into a unified, automated system, deeply resonates with me. The company's vision to create a seamless, transparent, and efficient infrastructure for a sustainable and decentralized energy future is both inspiring and aligns closely with my passion for leveraging advanced technology to solve real-world challenges.

Throughout my career, I have honed my skills in designing scalable backend systems and robust ETL pipelines, developing concurrent algorithms to enhance performance, and engineering machine learning-powered analytics and data infrastructures. My work has focused on translating advanced prototypes into production-ready solutions that reliably handle complex data workflows and improve operational efficiency. These experiences have equipped me with a strong problem-solving mindset and technical versatility to thrive in dynamic, data-intensive environments.

I am excited about the possibility of applying my expertise to support and enhance ArcTrade's digital energy platform. The opportunity to help innovate energy trading systems, optimize distributed energy resource management, and enable intelligent automation in the energy space is one I would passionately embrace.

Thank you very much for considering my application. I look forward to the possibility of discussing how my background and skills can contribute to the continued success and growth of ArcTrade.

Sincerely,

Kahbod Aeini
